1 Executive Summary

1. Unify account branding

Use one 4EB avatar template for the main and language accounts, retaining language labels. Link approved language-account bios to @radio4eb.

2. Reuse programme material

Turn existing interviews, presenter segments and community-event footage into short videos and programme introductions. Reuse reduces new filming and planning.

3. Use GPT for first drafts

Use fixed prompts to generate topic ideas, scripts and caption drafts. Have people familiar with the programme check facts and language before publication.

4. Assign roles and keep one calendar

Match sourcing, production and final approval to the people available. Volunteers or interns can help with guidance, shared templates and clear handovers; 4EB retains final approval.

5. Test on a small scale and adjust

Start with a few programmes. Record production time, listener interactions and clicks to programme links. Adjust the publishing frequency and expand only when the routine is manageable.

2 Introduction and Client Context

Use programmes as the starting point

Programmes, podcasts and listening pages give 4EB reusable stories and destinations across more than 50 language groups (Radio 4EB, n.d.-a).

Make production repeatable within the lean team's available time (Radio 4EB, 2025, pp. 5, 16).

Focus this pilot on programme discovery; keep other service information on existing channels.

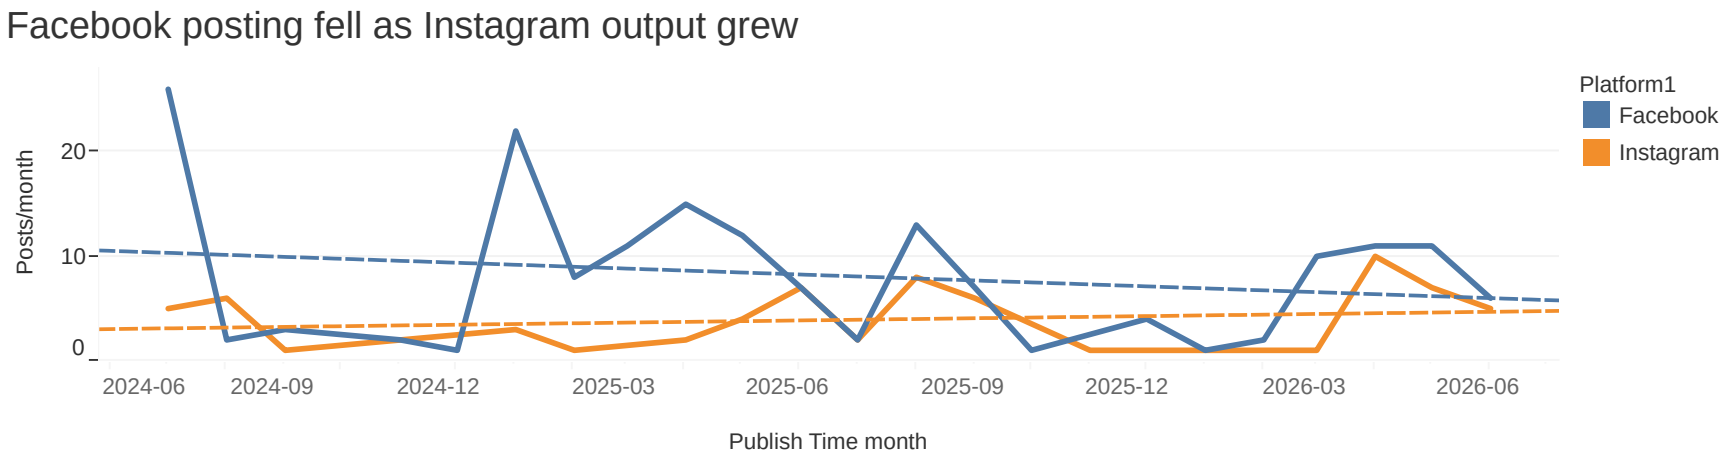

3 Social Media Audit and Situation Analysis

Start with Instagram and Facebook

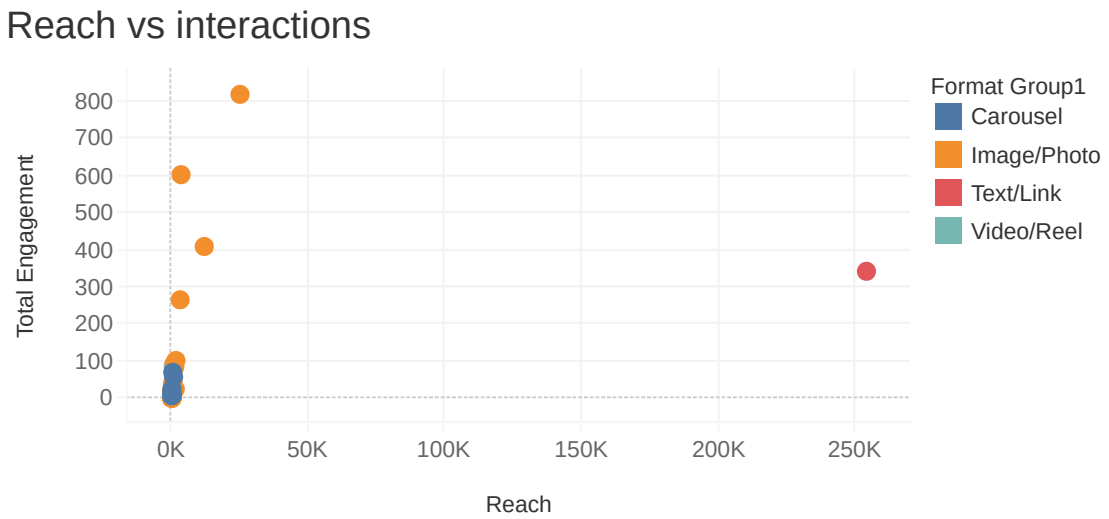

Use short videos to introduce programmes, listening guides to explain the next step, and consistent avatars to connect the accounts.

3.1 Current publishing and response

Posting trend: Facebook posts fell from 109 to 68, while Instagram posts rose from 31 to 42.

Reach and interactions
The highest-reach post was not the most interactive. Its reach also included paid promotion.

Figure 1. 4EB posts: trend FY2024–25/FY2025–26; scatter FY2025–26, n=110. Lifetime metrics include paid exposure.

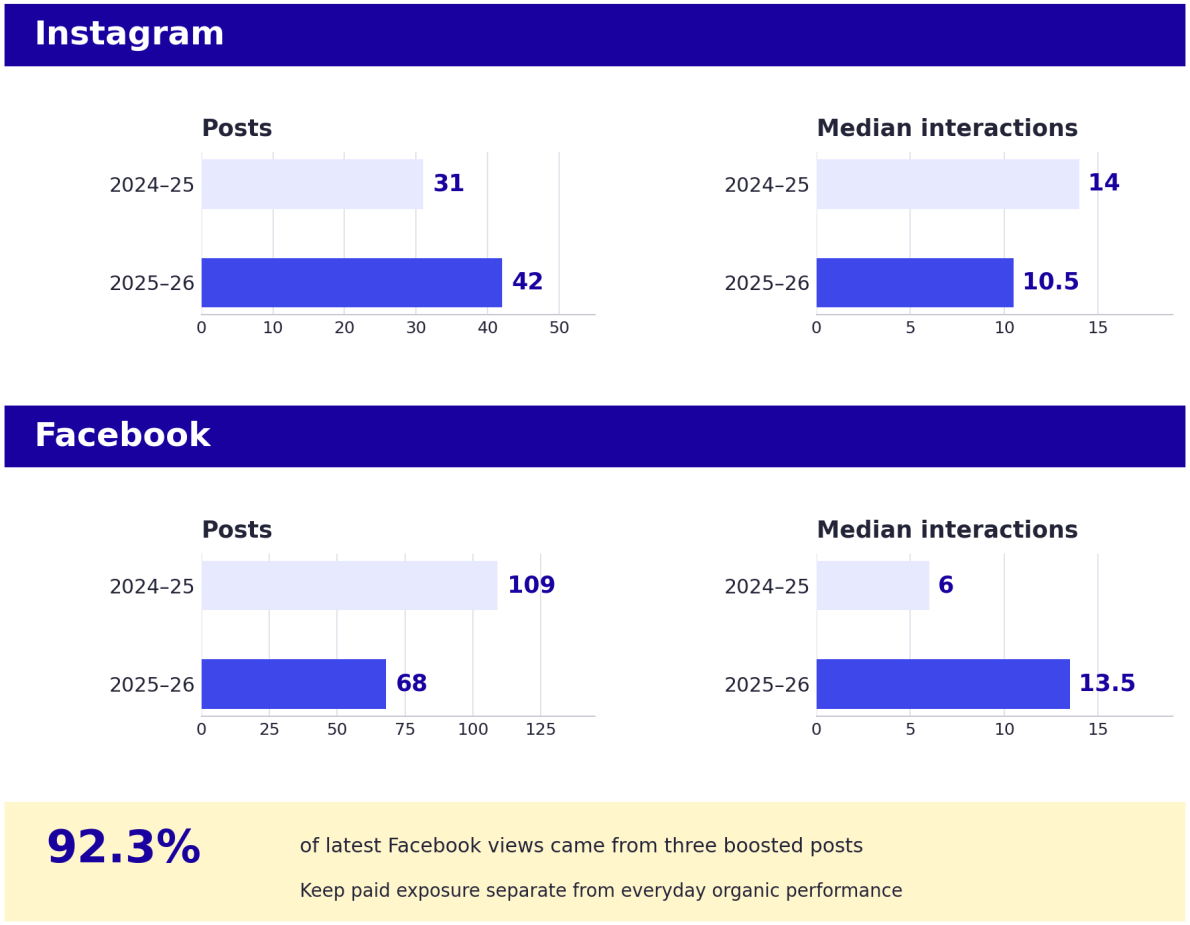

3.1 Look beyond posting volume

Read the platform comparisons

Instagram: Posts rose from 31 to 42, while median interactions fell from 14 to 10.5.

Facebook: Posts fell from 109 to 68, while median interactions rose from 6 to 13.5.

Paid exposure
Three boosted posts accounted for 92.3% of views in the latest Facebook period. This total includes paid exposure.

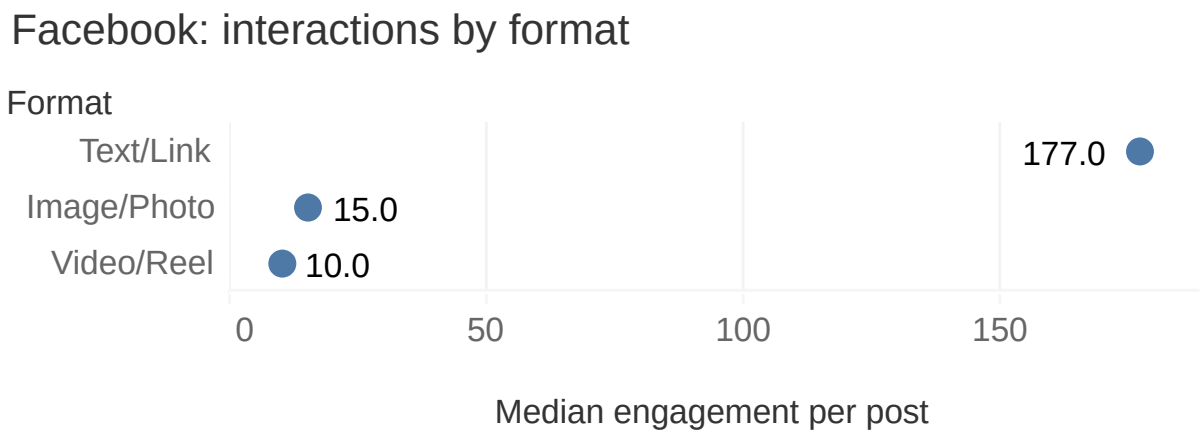

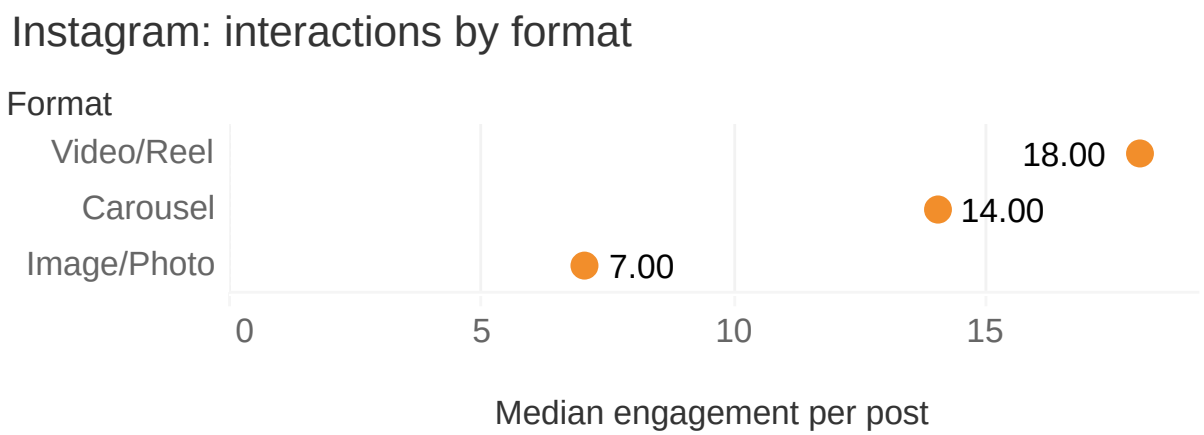

92.3% of latest Facebook views came from three boosted posts

Keep paid exposure separate from everyday organic performance

Figure 2. 4EB-only Lifetime medians.

3.1 Content formats to build on

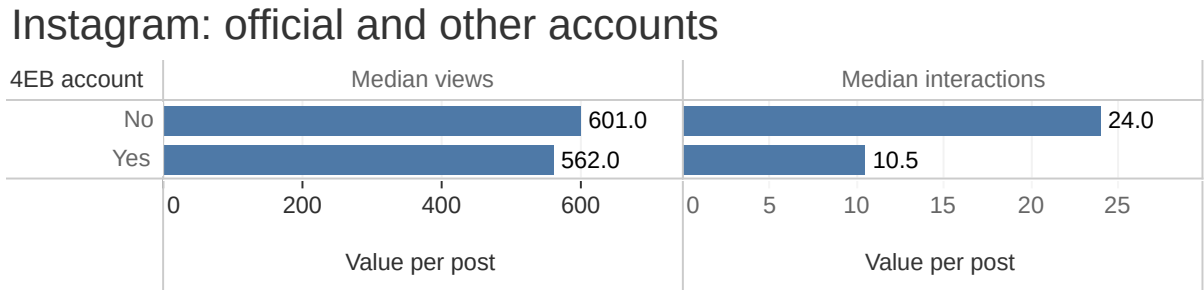

Figure 3. FY2025–26 median interactions, views and account comparison. Definitions and sources: Appendix A.

Facebook formats: Text/link posts had the highest median interactions at 177. This result comes from only two posts and includes paid exposure, so it does not establish typical organic performance.

Sample: 55 image posts, 11 videos and 2 text/link posts.

Instagram formats: Reels had the highest median interactions at 18, followed by carousels at 14 and images at 7.

Sample: 11 Reels, 9 carousels and 22 image posts.

Account comparison: Sampled other accounts had median views of 601 versus 562 for 4EB, and interactions of 24 versus 10.5. This does not demonstrate a collaboration benefit.

Yes labels 42 official 4EB posts; No labels 61 other-account posts.

3.1 Prioritise reusable Reels and guides

Reels lead Instagram

Reels recorded the highest median Instagram reach at 298, ahead of carousels at 173 and images at 121.5.

Median interactions followed the same order, with 18 for Reels, 14 for carousels and 7 for images.

Images drew more interactions

Facebook images recorded a median of 15 interactions, compared with 10 for video. Text/link posts reached 177, but this result is based on only two posts and includes paid exposure.

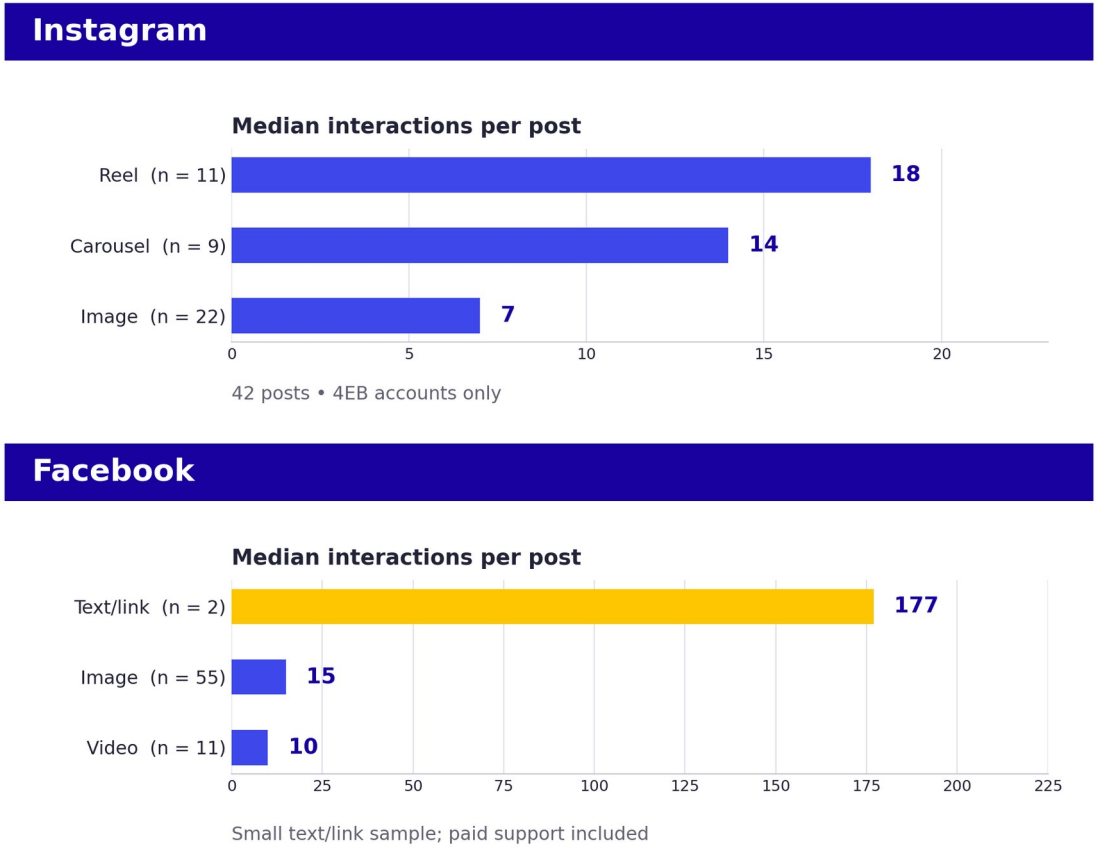

Figure 4. Latest-period median interactions and sample sizes; Facebook includes paid exposure.

3.2 Audience Analysis

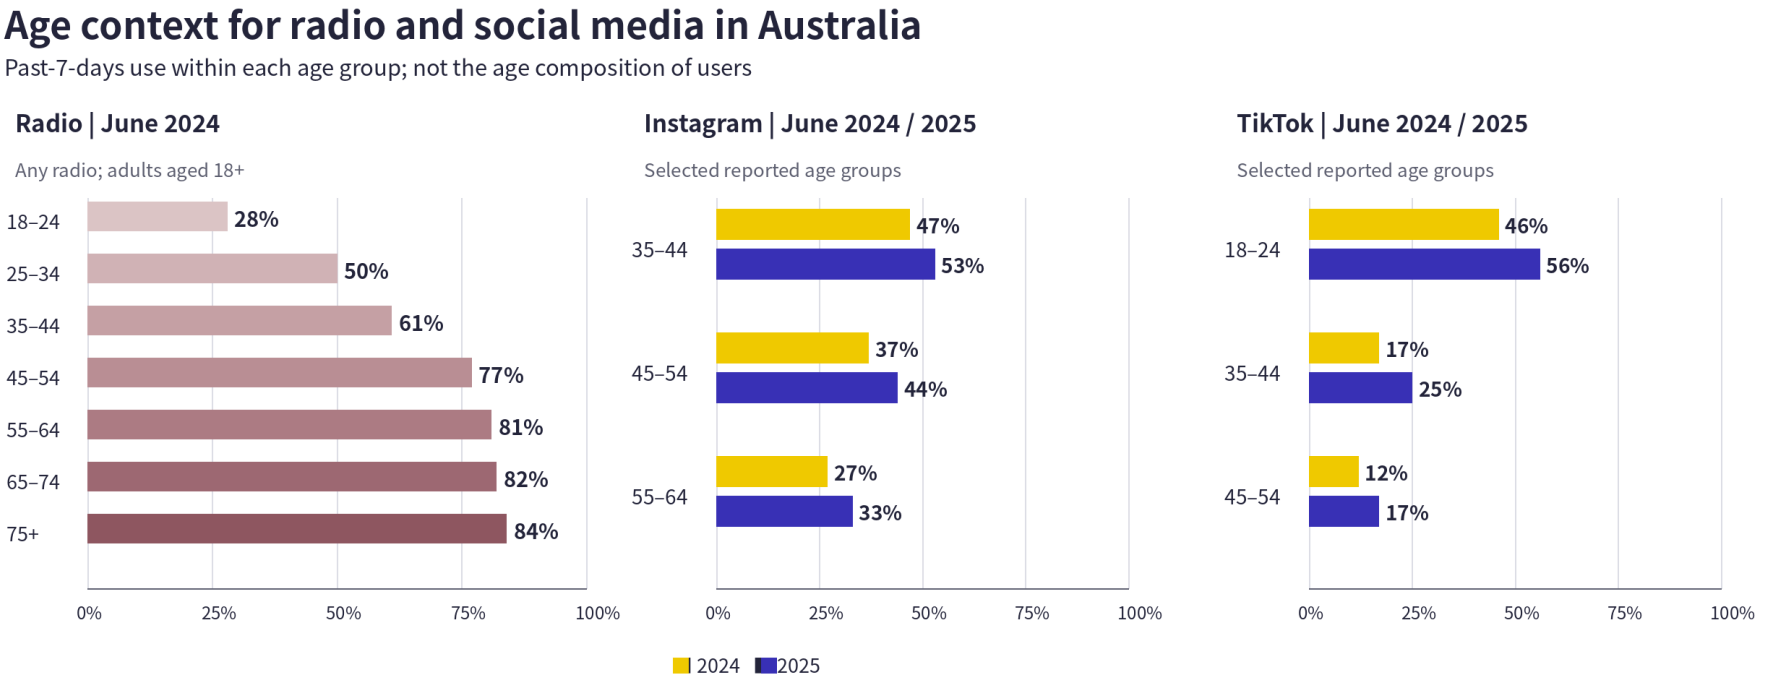

Figure 5. Australian age-group usage: radio 2024, platforms 2024/2025. National context, not 4EB audience data (ACMA, 2024; 2026).

Keep clear listening instructions for older audiences alongside younger and midlife discovery. Maintain Facebook service information, build Instagram content and test TikTok later.

3.2 Give 4EB accounts one identity

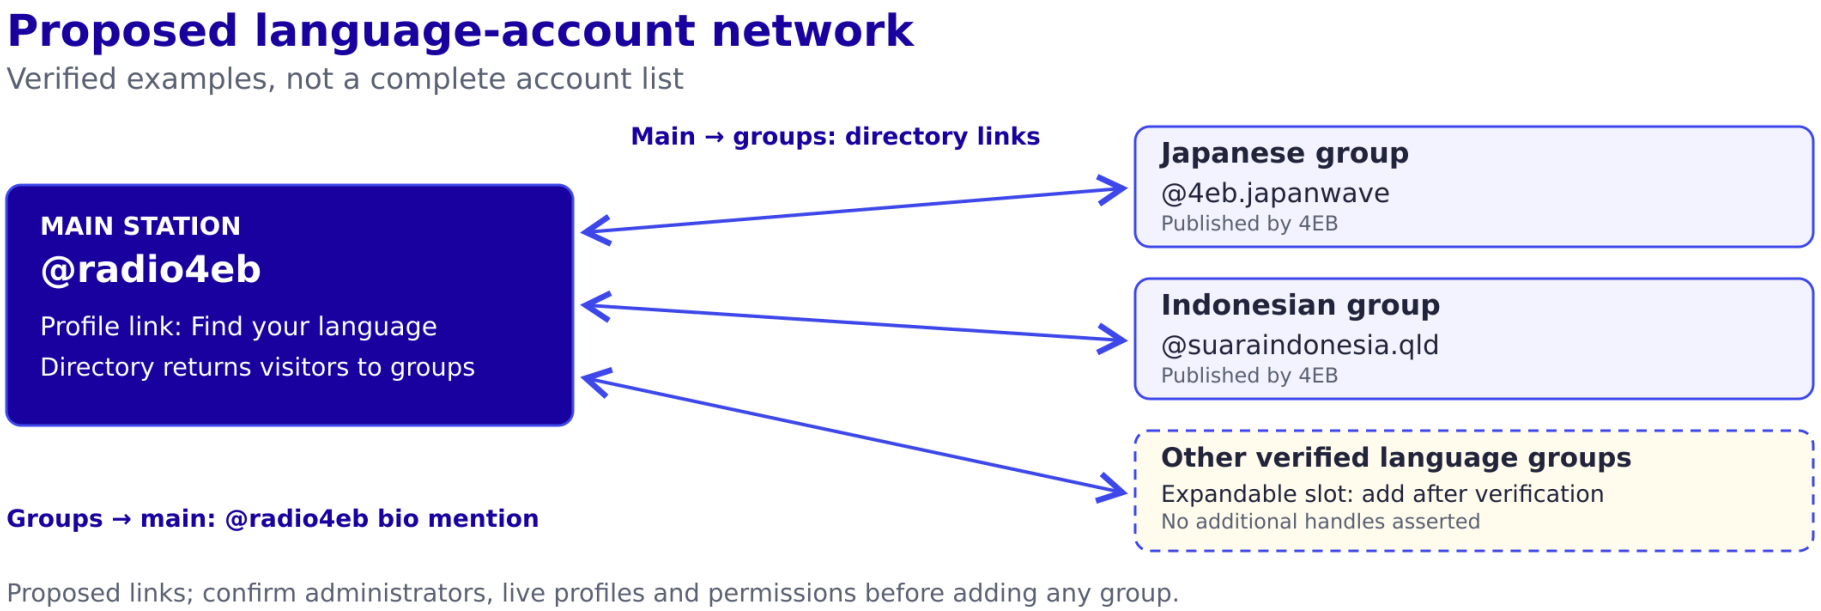

Figure 6. Proposed account links, using examples on 4EB's group pages, checked 6 October 2026.

Main station and account link | Japanese group account | Indonesian Instagram contact | Community directory

Link approved language accounts through the directory and @radio4eb bio mentions, connecting each group with the station (Instagram, 2018).

Bio-link reference: Instagram (2018), Figure D3.

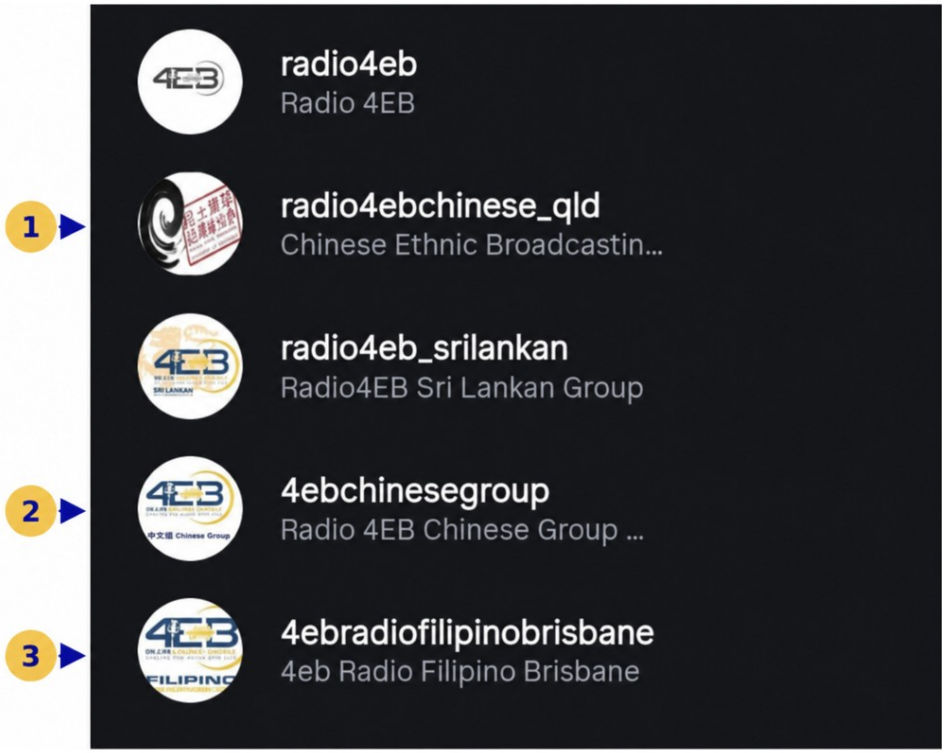

Use the same 4EB logo, colours and layout; change only the language label. Put full language names in display names.

Figure 6b. Design proposal using the report's existing official 4EB logo; no adoption is claimed.

3.2 Make 4EB recognisable in search

Observed screenshot

Recommended changes

1 Keep one recognisable 4EB mark

Avatar treatments differ. Keep cultural accents; align the 4EB logo, palette and circular safe area.

2 Clarify account relationships

Two Chinese-labelled results appear. Clarify their roles. Standardise display names: “Radio 4EB | [language]”.

3 Make small avatars readable

Fine text crowds the circular crop. Reduce avatar text; retain language identifiers in display names.

Next: confirm owners, add @radio4eb in approved bios and test recognition.

Source: user-supplied search snapshot, received 6 October 2026. Ownership and ranking are unverified.
Visual variation is observed; improved discovery is a proposal to test.

Figure 7. Search snapshot supplied 6 October 2026. Confirm ownership before changing any listed account. Display edited to remove follow buttons and markup; account names and avatars retained.

3.2 Combine shared branding with clear links

Observed profile details

1 Same SBS symbol and orange circle

Language stays in display names.

2 Bio names @triple_j

Visible referral text; click-through untested.

Recommended: pair common 4EB avatars with approved @radio4eb bio mentions.

Captured 6 October 2026. Sources: Instagram profiles; SBS (2022), pp. 12, 17.

@sbschinese @sbs_cantonese @triplejhack

Figure 8. SBS avatar family and Hack bio-link reference, captured 6 October 2026.

Hack profile | SBS Chinese | SBS Cantonese | ABC directory

3.3 Competitor Analysis

Use a small set of recognisable formats that the team can repeat.

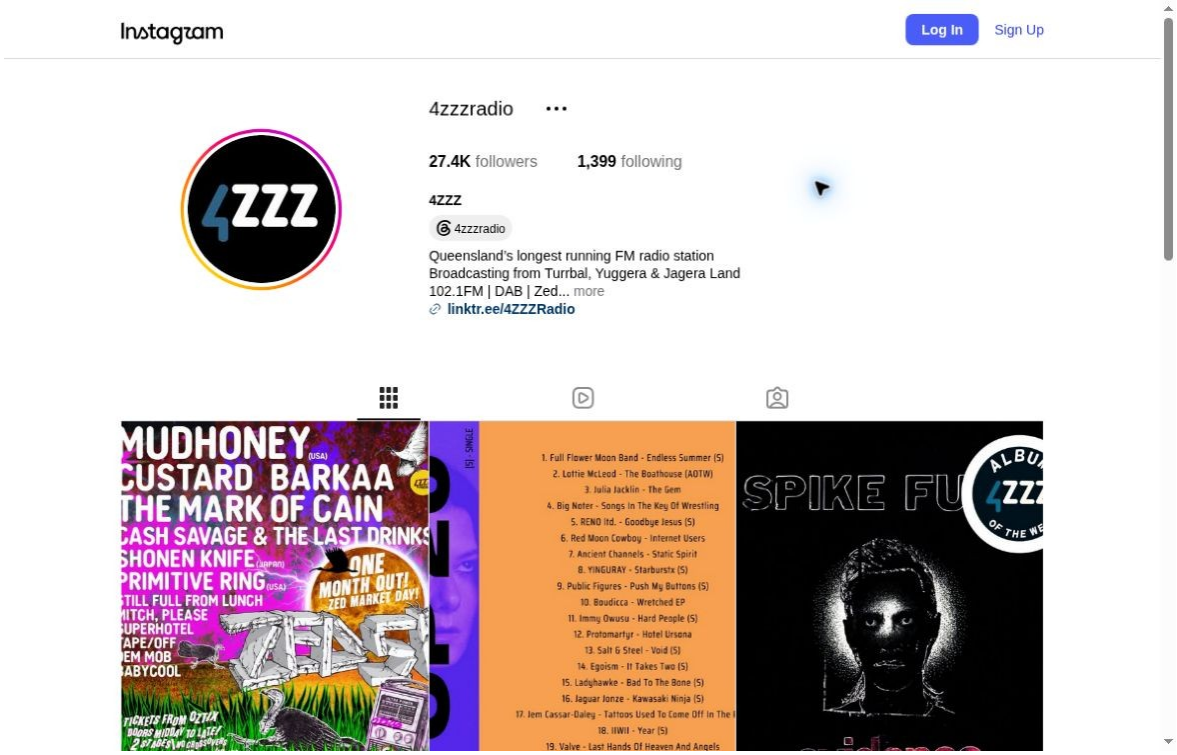

Figure 9. @4zzzradio profile, 6 October 2026.

Observed	Low-cost lesson
Recurring music/event artwork.	Reuse one carousel master for recurring programme and event updates; keep its title and visual style consistent.

Source context: Figure D4.

3.3 Ideas to borrow from SBS

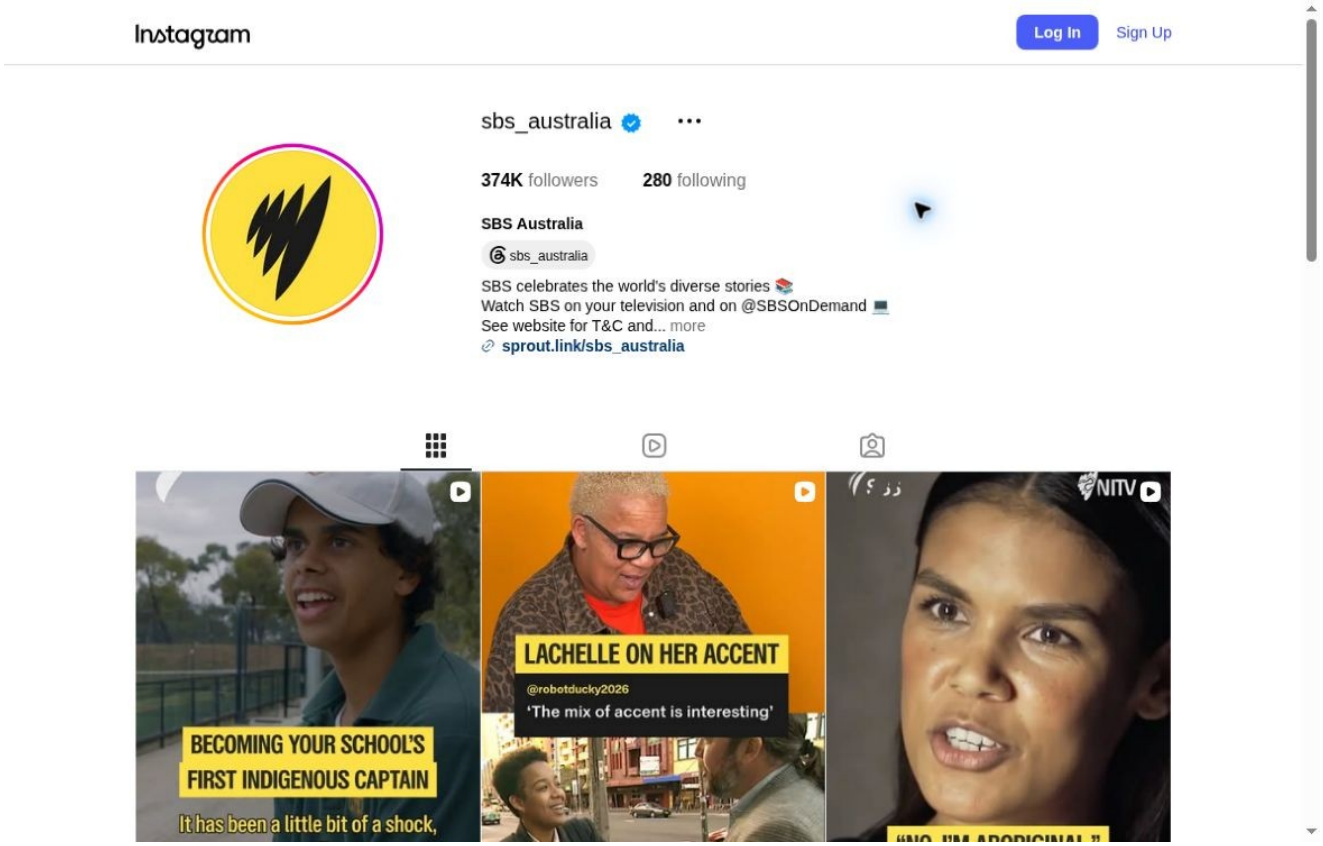

Figure 10. @sbs_australia profile, 6 October 2026.

Observed	Low-cost lesson
Captioned culture clips and consistent covers.	Use a recognisable Reel cover, reviewed subtitles and a specific listening instruction.

Listening-route reference: Figure D5.

3.3 Ideas to borrow from Triple A

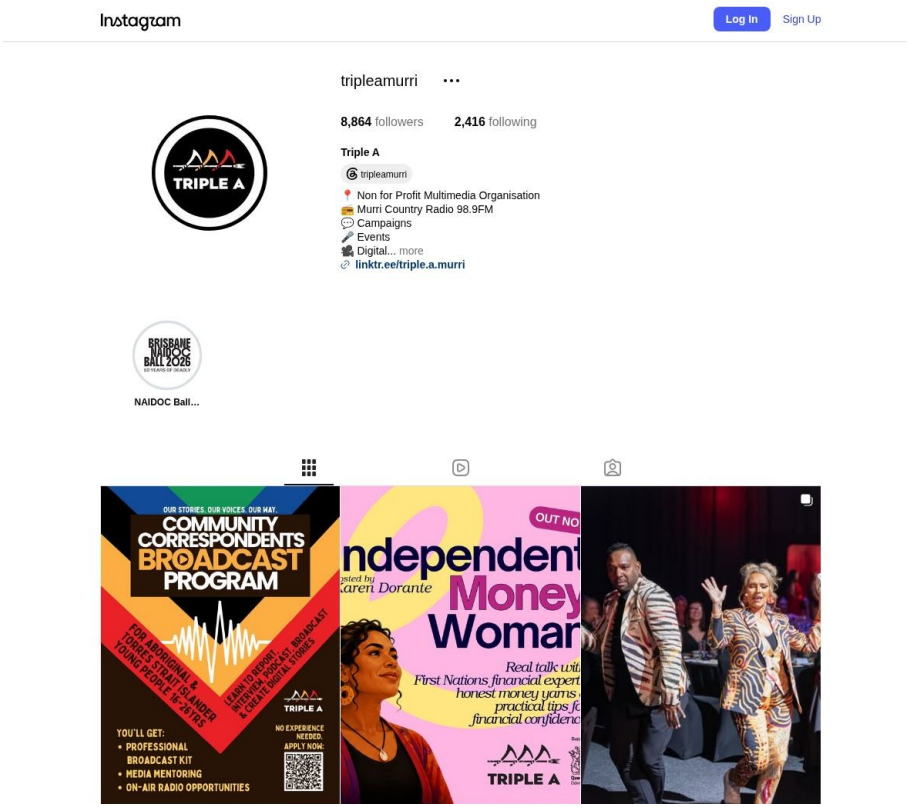

Figure 11. @tripleamurri profile, 6 October 2026.

Observed	Low-cost lesson
Programme, recruitment and event posts.	Reuse cleared presenter clips with one invitation to listen; keep contributor permission and language review.

Combine a presenter-led Reel with a clear listening guide. Choose formats by programme clicks and production effort, rather than competitors' publishing volume.

4 Key Social Media Gap and Opportunity (SWOT)

S Strengths

- Observed: established language communities and presenter voices.
- Live, podcast and programme destinations (Radio 4EB, n.d.-a).

W Weaknesses

- Historical resource pressure; confirm capacity (Radio 4EB, 2025, p. 5).
- Age profile and listening conversion remain unverified (Appendices A, B).

O Opportunities

- Proposed: test Reels and carousels using one recording (Figure 4).
- Connect verified language accounts to listening routes (Figure 6).

T Threats

- Risk: paid outliers can mislead benchmarks (Figure 1).
- Rights, translation and approval delays need controls (Section 8.5).

Sources: 4EB exports, website and annual report (Radio 4EB, 2025; n.d.-a–n.d.-e).

5 Strategic Framework

Existing programme material → ChatGPT draft → shared template → human review → Instagram and Facebook.

Content purpose	What to publish	What to track
Be discovered	Entertain: a presenter's phrase or memory opens a short Reel	Seven-day reach; relevant comments
Feel included	Tell the brand story: community voices, reviewed captions and replies	Questions answered; approved contributions
Find a programme	Educate: a saved listening guide and programme-specific link	Clicks to programme links

Each pair should attract attention, introduce the programme and explain how to listen.

6 Content Strategy

Reuse the same story and link

Turn a cleared programme excerpt, presenter introduction or useful fact into a 20–40-second Reel and a three-to-five-card listening guide.

Invite up to four willing groups in turn. Start smaller or publish fortnightly when needed, keeping permission and language review.

7 Platform Strategy

Facebook: reuse approved clips with a conversational caption, question and direct programme link; retain community notices.

Instagram: pair a captioned Reel with a listening guide. Adapt captions and links; audio-only excerpts can use cleared existing visuals. YouTube uploads are optional and require additional time.

Keep TikTok @radio4eb for later. Once the core routine works, consider two reused clips over two weeks, with separate review/moderation time. Check access and assess useful responses against effort (Radio 4EB, n.d.-a; TikTok, n.d.).

8 Creative Execution

8.1 Use one shared calendar

Use this proposed 12-week calendar as a starting point; adjust time allowances to team availability (Beyond The Airwaves, n.d., slide 6).

W1–2 SET UP	W3–10 PUBLISH ONE PAIR A WEEK		W11–12 REVIEW
8 person-hours	A–B–C–D × 2 | 8 packages / 16 assets | 32 hours		4 person-hours
1 MON Prepare → Cleared source → paired draft. 135 combined minutes	**2 MON Review** → Language/rights review; approve exact exports. 30 combined minutes	**3 TUE Reel / FRI Carousel** → Authorised release; optional Facebook reuse included. 30 combined minutes	**4 Release + next workday** Answer/escalate questions; log seven-day results. 45 combined minutes

Keep files, owner, date and approval together. Schedule approved content and check each post after publication.

Keep the workload manageable

Allow an indicative 44 team-hours including review/training. Use eight setup hours for templates, pilot permissions, avatars and links; reduce accounts or posts if this will not fit.

8.2 Assign clear handovers

Allocate these functions within the existing team; one person may cover several. Add volunteer/intern help where available (Radio 4EB, 2025, pp. 5, 12, 16).

1 Programme representative →	2 Volunteer or supervised intern →	3 Language owner and staff editor
Supply story, facts, cleared media and language reviewer.	Build the pair from templates; test links.	Check meaning and facts; consolidate feedback and authorise release.

Backup resumes the checked package, not its approval.

Include two combined hours for template training within setup.

8.3 Use ChatGPT to prepare the first draft

One approved source, one content package

Use ChatGPT options and existing tools for one pair; log time to assess its value.

1 Verified input

Cleared facts, transcript, media, URL and restrictions.

→

2 ChatGPT options

Draft hooks, storyboard and paired copy; flag gaps. A person selects.

→

3 Volunteer or intern build

Use approved templates/tools: Canva layout, CapCut edits, DeepL translation drafts. ChatGPT neither edits footage nor publishes.

↓

4 Language owner review

Check names, language and culture; hold if competent review is unavailable.

←

5 Editorial approval

Check claims, quotes, links and consent; approve the exact export.

←

6 Calendar and results

Authorised editor schedules; rota records results, time and corrections.

Keep private information and consent records at 4EB. Give AI cleared material only; people check facts, language and rights (OpenAI, n.d.-a).

ChatGPT icon source: OpenAI (n.d.-b).

8.4 Copy this prompt and build the pair

Example brief: one consenting adult presenter, a cleared studio excerpt, verified programme details and a listening link. Complete the bracketed fields from the approved source before using the prompt.

Pillar	ChatGPT brainstorm option	Production choice
Entertainment	“What does home sound like to you?”	Open with a question; follow with the presenter’s exact words.
Brand Storytelling	“Meet the voice behind [programme]”	Select an approved reason for broadcasting; avoid invented biography.
Educational	“How can you hear [programme]?”	Use the same story to explain the verified listening route.

Prompt to reuse

“Use only this cleared brief: [facts, transcript/timestamps, permitted media, URL, restrictions]. Suggest three hook questions and recommend one with a reason. Draft a 20–40-second Reel edit plan, three-to-five carousel cards, Instagram/Facebook captions and a handover checklist. Preserve exact quotes, names and programme titles. Mark missing details [CHECK]. Do not invent stories, times, translations, rights or approvals. Keep a single listening action.”

Example content package

Asset	Reviewable draft
Reel 0–3 seconds	Studio shot; question: “What does home sound like to you?”
Reel 4–20 seconds	[Exact approved phrase or memory + supplied timestamp]; reviewed English captions.
Reel 21–30 seconds	[Programme] + verified route. “Find [programme] through our profile link.”
Carousel 3–5 cards	Question → approved story context → programme facts → how to listen.
Platform captions	Instagram: “Meet [name], a voice behind [programme]. [Approved context]. Find [programme] through our profile link.” Facebook: same checked context, with a direct tagged link.

Choose one hook for both posts. Use the presenter’s exact words, reviewed subtitles, readable contrast and concise image descriptions. Respect any limits on reuse; never invent a quote or cultural explanation.

8.5 Reuse these visual templates

Proposed templates: replace brackets with approved programme information.

REEL COVER / 9:16	CAROUSEL COVER / CARD 1	LISTENING GUIDE / FINAL CARD
What does home sound like to you?	**Meet the voice behind [programme]**	**Hear the full story**
[Consenting presenter's portrait or studio footage]	[Approved presenter image] [Name] • [Programme] • [Language]	[Programme] [Language] [Verified day and time / on-demand availability]
[Reviewed captions for the real phrase or memory]	[One sentence of reviewed story context]	Instagram: open our profile link and select [programme]. Facebook: use the direct link in this post.
Find [programme] through our profile link.	Swipe for the listening guide.	[Verified destination / tagged link]

Before publishing

Test mobile listening links, subtitles and permission before publication.

Use existing moderation. Hold posts or reduce output when production or approval falls behind.

9 Measurement and Evaluation

9.1 A compact results log

Assign social coordinator and manager roles internally. Use seven-day post-age data; engagement rate = same-window interactions ÷ reach × 100. Count available likes/reactions, comments, shares and saves consistently within each platform; mark missing or zero-reach rates N/A.

What to track	Measure	Role / review
Discovery and engagement	Median reach and engagement rate by format; post count	Coordinator / weekly
Clip retention	Watch time or percentage viewed; similar lengths within platforms	Coordinator / weekly
Programme access	Clicks, UTM sessions and verified player starts, separately	Coordinator / weekly; manager / monthly
Community	Comments, messages, net follows; replies and escalations	Station manager / monthly
Delivery and capacity	Published/planned assets; team hours, corrections, handovers	Coordinator / weekly

9.2 Review results and effort

Keep the 12-week plan and fixed pilot baseline. Flag paid promotion and events; small samples remain inconclusive. UTM traffic is not listening; verify analytics access (Google, n.d.). Adjust hooks, links or output. Compare similar manual tasks before claiming time savings.

10 Conclusion

Start with shared avatars, reusable templates and one cleared source. Review the first cycle together, simplify slow steps and repeat what brings programme clicks.

Appendix A Evidence and Metric Notes

Design source: Radio 4EB's homepage and logo, reviewed 6 October 2026. Logo: https://www.4eb.org.au/wp-content/uploads/2020/02/5Logo-4EB_No-Words_Transparent.png

Photo credits: archival photographs are from Radio 4EB Annual Report 2024–2025. Cover: annual report pp. 16–17. Report p. 3: annual report pp. 10 and 17. Report p. 4: annual report p. 16. Report p. 22: annual report p. 17. Crops are editorial; pictured people are not presented as current staff or pilot participants. Confirm reuse rights before wider distribution.

Dates and records

Source filenames use July–June financial years. Earlier worksheet names end on 27 June, so both comparisons use 1 July–27 June, or 362 days. All observed records fall within these windows. No values were filled in or silently removed.

Account labels

One record represents one platform post. Account labels come from Facebook page names and Instagram usernames. They do not show who approved the post or whether another account collaborated with 4EB. Cross-platform posts remain separate records. Original file, sheet and row details are retained because older numeric Instagram identifiers have a precision limitation.

Metric limits

The exports may not contain every post. All counters are Lifetime measures, and snapshot date and timezone are unknown. They cannot establish the best local posting time, audience growth or cause and effect. Facebook video-view demographic fields appear on only nine of 68 latest-period records; they cannot describe the whole audience.

Reach and paid support

In the earlier Facebook export, 55 of 110 records show organic reach above total reach. Missing views and inconsistent reach fields remain in the audit. All 61 latest-period other-account Instagram records lack reach. Do not use them to compare interactions per person reached or claim a collaboration benefit.

Scope of the supporting evidence

Figures 9–11 are dated profile snapshots and official-site context. The exports do not include a complete audience-demographic or public-comment study.

Instagram account comparison

The Instagram comparison uses 42 4EB and 61 other-account posts, not the two-year total of 82 other-account records.

Appendix B Audience Evidence and Method

Figure 5 reports national past-seven-days use within age groups, not audience age composition. Radio covers any radio, not specifically community radio or 4EB. Its complete age breakdown is June 2024; platform examples are June 2024/2025. The surveys do not identify the same individuals or radio–platform overlap. Omitted platform ages are not zero; no Facebook age series is inferred.

ACMA method: nationally representative Australian adults aged 18+, weighted probability-panel surveys, online/phone. June 2024 fieldwork: 17 June–1 July, n=3,530. Radio age bases from 18–24 through 75+: 194, 487, 670, 615, 615, 608, 339. June 2025 fieldwork: 16–30 June, n=5,990; selected platform age bases 18–24/35–44/45–54/55–64: 525/1,265/977/885. Rounded estimates; no significance test or matched-person inference is claimed (ACMA, 2024, Figure 8, p. 16; 2026, p. 4; n.d.).

Supplementary platform observations

The official 4EB website links @radio4eb. The public TikTok profile was checked on 6 October 2026, but its feed failed to load; cadence, performance, account type and link eligibility remain unverified (Radio 4EB, n.d.-f). TikTok lists 1,000 followers or a Registered Business Account for website links, with regional availability limits (TikTok, n.d.).

The triple j video “End the zoom now” (22 June 2026) shows a short interview moment, split screen and captions. This dated observation supports a format example, not a performance benchmark or a right to reuse its footage (triple j, 2026).

Template provenance

The supplied Beyond The Airwaves slide 6 (printed p. 4) is a blank planning template. Its “Published” label, placeholder dates/GMT times and mon–fri labels do not establish publishing history or a five-post cadence. Section 8’s entries are proposed.

Appendix C Report Responsibilities

Project team responsibilities.

Report section	Main focus	Owner
1 Executive Summary	Overall project summary	Freesia
2 Introduction and Client Context	4EB background and project challenge	Freesia
3 Social Media Audit and Situation Analysis	Current 4EB social presence	Reileen
3.2 Audience Analysis	Target audience and audience behaviour	Jason
3.3 Competitor Analysis	Competitor and benchmark research	Jason
4 Key Social Media Gap and Opportunity (SWOT)	Identify the problem and opportunity	Freesia + Reileen
5 Strategic Framework	Overall strategy and objectives	Freesia

Appendices	Audit, charts, mockups and supporting material	Everyone / relevant owner

Appendix D Reference Evidence for Sections 3.2–3.3

Original-source captures supporting the audience context and competitor examples. Source pages were captured on 8 October 2026; the profile snapshots retain their 6 October 2026 date.

ACMA platform page numbering: printed p. 4 is PDF page 8; printed p. 5 is PDF page 9. Figure 5's six platform age-series comparisons are on printed p. 4. Page 5 supplies adjacent context. The radio panel uses a separate 2024 source, cited in Appendix B and References.

Figure	Original source	Connection to the report
D1	ACMA (2026) Weekly platform use	Section 3.2, Figure 5 platform panels: all six platform age-series comparisons appear under "previous 7 days" in the lower part of this page. The earlier "6 months" figures use a different timeframe.
D2	ACMA (2026) Frequency and messaging context	Adjacent source page supplied with the original pp. 4–5 citation. Frequency and messaging measures provide context; they are not the six weekly age values plotted in Figure 5.
D3	Instagram (2018) Bio profile links	Section 3.2: the official announcement explains clickable profile mentions in bios. It supports the proposed linking mechanism, without proving current click-through or audience growth.
D4	4ZZZ (n.d.) Participate	Section 3.3, Figure 9 comparison: 4ZZZ describes a public volunteer route through subscription, application, induction and position applications. This does not verify its Instagram workflow or performance.
D5	SBS (2024) Language programme listening routes	Section 3.3, Figure 10 comparison: SBS documents radio, digital TV, website and app listening routes, with selected podcast and streaming options. This supports a specific listening instruction as a proposed 4EB application.
D6	Triple A (n.d.) About Us	Section 3.3, Figure 11 comparison: Triple A identifies itself as Indigenous community-controlled media and describes radio, video production, media training and events. The source supports organisational context, not a performance benchmark.

Method note: the sample and weighting details in Appendix B come from ACMA's methodology page. Percentages are weighted estimates; sample bases are unweighted counts. The source link below supplements the page captures.

ACMA official survey methodology

Reading limit: official pages verify organisational context and stated public processes. They do not establish Instagram cadence, internal workflows, audience ages or performance. Proposed applications still require 4EB to confirm capacity, permissions and results.

Figure D1 ACMA (2026) Weekly platform use

Section 3.2, Figure 5 platform panels: all six platform age-series comparisons appear under “previous 7 days” in the lower part of this page. The earlier “6 months” figures use a different timeframe.

Open official original source | Printed p. 4; PDF page 8 | Captured 8 October 2026

How we communicate: Executive summary and key findings. Full original source page.

- Those aged 75+ were less likely than all younger age groups to have used an app for messages (48%), voice calls (36%) or video calls (32%).

3. Which websites or apps were used

Base: Australian adults, **6 months** to June 2025

- Almost all of us used a communication or social media website/app (98%, steady from 2024). Facebook (78%) remained the most widely used platform in the previous 6 months, followed by YouTube (71%) and Facebook Messenger (71%). Messenger usage declined in 2025, from 74% in 2024.
- Use of Instagram, TikTok, Reddit, Telegram, Threads and Pinterest increased from 2024.
  - Instagram increased to 53% (from 50%), with growth among those aged 35–44 (63%, from 57%), males (44%, from 40%), females (63%, from 60%) and those living in metropolitan areas (56%, from 52%).
  - TikTok increased to 30% (from 27%), with growth among those aged 35–44 (36%, from 28%) and 45–54 (25%, from 19%), males (23%, from 19%) and those living in metropolitan areas (33%, from 28%).
  - Reddit increased to 25% (from 22%), with growth among those aged 35–44 (33%, from 26%), 55–64 (14%, from 8%), and 75+ (5%, from <0.5%), females (23%, from 19%) and those living in metropolitan areas (28%, from 24%).
  - Pinterest increased to 20% (from 17%), with growth among those aged 25–34 (24%, from 18%), females (30%, from 26%) and those living in metropolitan areas (20%, from 16%).
  - Telegram increased to 9% (from 7%) and Threads increased to 8% (from 4%).
- Facebook Messenger, Snapchat and X usage declined from 2024.
  - Facebook Messenger usage declined to 71% (from 74%), with falls driven by females (78%, from 83%) and those living in metropolitan areas (70%, from 74%).
  - Snapchat declined to 21% (from 24%), with falls driven by females (27%, from 32%), those living in metropolitan areas (20%, from 23%), and those aged 18–24 (50%, from 60%).
  - X declined to 14% (from 16%).

Base: Australian adults, **previous 7 days** to June 2025

- Facebook (68%), Facebook Messenger (60%) and YouTube (56%) were the 3 most popular services.
- Instagram and TikTok use increased from 2024.
  - Instagram use increased to 45% (from 41%), with growth among those aged 35–44 (53%, from 47%), 45–54 (44%, from 37%), and 55–64 (33%, from 27%), males (35%, from 30%), females (55%, from 51%) and those living in metropolitan areas (47%, from 42%).
  - TikTok use increased to 23% (from 18%), with growth among those aged 18–24 (56%, from 46%), 35–44 (25%, from 17%), and 45–54 (17%, from 12%), males (16%, from 11%) and those living in metropolitan areas (25%, from 20%).
- Facebook Messenger and X use declined from 2024.

Figure D2 ACMA (2026) Frequency and messaging context

Adjacent source page supplied with the original pp. 4–5 citation. Frequency and messaging measures provide context; they are not the six weekly age values plotted in Figure 5.

Open official original source | Printed p. 5; PDF page 9 | Captured 8 October 2026

How we communicate: Executive summary and key findings. Full original source page.

- Facebook Messenger use declined to 60% (from 63%), with falls driven by those aged 18–24 (50%, from 61%), females (67%, from 73%) and those living in metropolitan areas (58%, from 62%).
- X use declined to 9% (from 11%), with falls driven by those aged 18–24 (16%, from 24%) and 65–74 (4%, from 7%), and those living in regional areas (6%, from 9%).

4. The frequency of website/app use

Base: Australian adults who used each specific website/app, previous 6 months to June 2025

- 41% used Instagram multiple times a day, up from 37% in 2024. Increases from 2024 were among those aged 35–44 (49%, up from 34%) and 55–64 (25%, up from 17%), and males (38%, up from 30%).
  - Those in metropolitan areas (43%) were more likely than those in regional areas (35%) to use Instagram multiple times a day.
- 28% used WhatsApp multiple times a day, up from 24% in 2024. Increases from 2024 were among those aged 18–24 (27%, up from 12%) and 35–44 (42%, up from 35%), and males (30%, up from 25%).
  - Those aged 35–44 (42%) were more likely than all other age groups to use WhatsApp multiple times a day.
  - Those in metropolitan areas (31%) were more likely than those in regional areas (17%) to use WhatsApp multiple times a day.
- 7% used FaceTime multiple times a day, up from 5% in 2024. Increases from 2024 were among males (9%, up from 4%) and in those in metropolitan areas (8%, up from 5%).

5. What we used for messages and calls

Base: Australian adults, previous 7 days to June 2025

Used for messages

- Most of us used a communication or social media website/app for messages (84%), with females more likely than males (88%, compared to 81%).
- Use of Facebook Messenger, Facebook and Snapchat for messaging declined from 2024.
  - Facebook Messenger use declined to 55% (from 59%), with falls driven by those aged 18–24 (46%, from 59%) and 25–34 (67%, from 74%), females (62%, from 69%) and those living in metropolitan areas (52%, from 57%).
  - Facebook use declined to 14% (from 16%), with falls driven by those aged 45–54 (14%, from 20%), females (13%, from 16%) and those living in metropolitan areas (12%, from 15%).
  - Snapchat use declined to 12% (from 14%), with falls driven by those aged 25–34 (21%, from 27%), females (16% from 19%) and those living in metropolitan areas (10%, from 13%).
- Younger people (18–24) were heavier users of messaging on Instagram (51%), Snapchat (35%), TikTok (18%) and Discord (16%), compared to all other age groups.
- Females were more likely than males to use these websites/apps for sending messages – Facebook Messenger (62%, compared to 49%), Instagram (30%, compared to 18%), Snapchat (16%, compared to 8%), and TikTok (7%, compared to 4%).

Figure D3 Instagram (2018) Bio profile links

Section 3.2: the official announcement explains clickable profile mentions in bios. It supports the proposed linking mechanism, without proving current click-through or audience growth.

Open official original source | Web excerpt; 21 March 2018 | Captured 8 October 2026

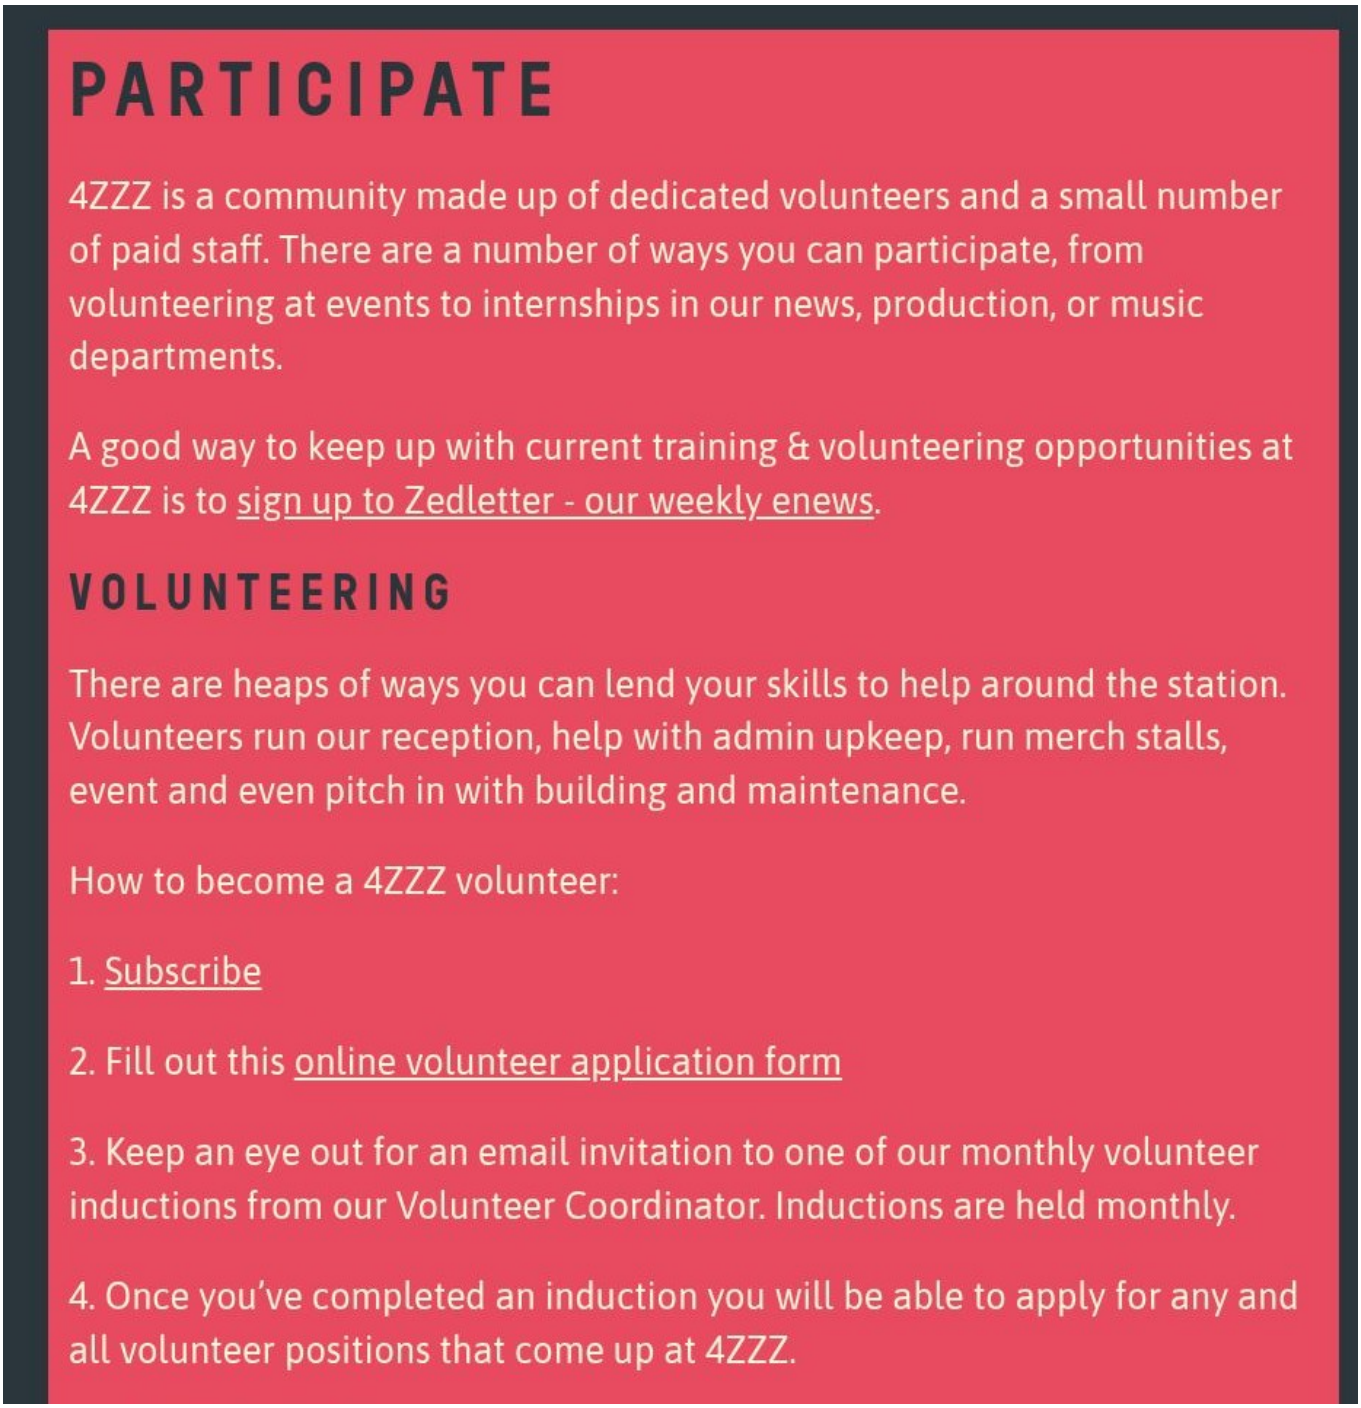

Today, we're introducing hashtag and profile links in bio, a new way to express yourself and the things you care about. Now when you include a # or @ in your bio, they become live links that lead to a hashtag page or another profile.

Figure D4 4ZZZ (n.d.) Participate

Section 3.3, Figure 9 comparison: 4ZZZ describes a public volunteer route through subscription, application, induction and position applications. This does not verify its Instagram workflow or performance.

Open official original source | Web excerpt; Volunteering | Captured 8 October 2026

PARTICIPATE

4ZZZ is a community made up of dedicated volunteers and a small number of paid staff. There are a number of ways you can participate, from volunteering at events to internships in our news, production, or music departments.

A good way to keep up with current training & volunteering opportunities at 4ZZZ is to sign up to Zedletter - our weekly enews.

VOLUNTEERING

There are heaps of ways you can lend your skills to help around the station. Volunteers run our reception, help with admin upkeep, run merch stalls, event and even pitch in with building and maintenance.

How to become a 4ZZZ volunteer:

1. Subscribe

2. Fill out this online volunteer application form

3. Keep an eye out for an email invitation to one of our monthly volunteer inductions from our Volunteer Coordinator. Inductions are held monthly.

4. Once you've completed an induction you will be able to apply for any and all volunteer positions that come up at 4ZZZ.

Figure D5 SBS (2024) Language programme listening routes

Section 3.3, Figure 10 comparison: SBS documents radio, digital TV, website and app listening routes, with selected podcast and streaming options. This supports a specific listening instruction as a proposed 4EB application.
